OTA

MEMORANDUM FOR THE RECORD

SUBJECT: Telecomm With OTA Personnel

25X1 1. Mr. Tom McGuirn, OTA called me on 26 April to ask how he should reference an OSI foreign solar energy study in a forthcoming OTA publication. He stated they found some of the material very useful and wanted to use it in OTA's energy report. I asked Tom to contact [redacted] who handled Congressional liaison for the DDS&T. The report he was referring to entitled, A Survey and Evaluation of Foreign Technology in Solar Thermal Energy Utilization, (June 75, OUO) was produced under contract by [redacted]. A copy was forwarded through the Legislative Council early this year.

25X1 2. Latter the same day, Herman Pollock who is a consultant for OTA, called regarding a report, Methodology for Analyzing International Technology Transfer. He thanked us for sending him a copy (also forwarded through LC) and asked whether we were producing others in the same vein. I told him not at this time but that a number of the foreign technology studies we had conducted considered the technology transfer issue. He said he would be in touch with us once the study he was developing, International Technology and World Trade, progressed to the industrial technology research phase.

[redacted] 25X1
